

Job Title: Mechanical Engineer

Location:

Job Description:

We invite final-year Mechanical Engineering students to join as project interns. The role provides practical exposure in design, manufacturing, and testing, with opportunities for pre-placement based on performance.

Responsibilities:

- Assist in CAD modeling, design validation, and prototyping.
- Support in production planning, quality control, and process optimization.
- Conduct testing, data analysis, and prepare project reports.
- Collaborate with senior engineers on ongoing projects.

Requirements:

- Final-year B.E/B.Tech in Mechanical Engineering.
- Knowledge of CAD tools (AutoCAD, SolidWorks, or CATIA).
- Strong fundamentals in design, thermodynamics, and manufacturing.
- Good teamwork, analytical, and problem-solving skills.

Benefits:

- Hands-on industrial project experience.
- Mentorship and technical guidance.
- Internship certificate + pre-placement opportunity (PPO) for top performers.
